You Can Understand the Above Chart As Below

If you enroll only 2 persons (A very low example), then you make Rs. 100/- as the achiever of 1st Growth Level. Now, each of the 2 persons who joined under you, refer minimum 2 persons each, you achieve the 2nd Growth Level, and that is another Rs. 100/- for you. Now those 4 persons each refer minimum 2 persons each, you achieve the 3rd Growth Level, and it will bring you Rs. 120/- ! Think about it, how speedily your network expands. You continue getting income accordingly as shown in the above chart. And all this with only 2 responses. Imagine in case you refer more than 2, Sky is the limit. And ofcourse, with an original investment of Rs. 300/- only. Amazing ! Please note that you didn't know any person personally or you didn't have to meet them personally, being joined in your network. But your network is growing on and on and on...Again, please be noted that it is not necessary, that you will get the income on completion of 2 persons at any level. *This is the most important thing which you should understand in this concept, that you will get the income every month on the basis of joinings in your network at any level, and it doesn't matter that whether you have achieved the minimum 2 joinings in your network or not.*
